Professional Summary

Full-stack engineering graduate (B.Tech, VIT, GPA 8.58) with hands-on experience building scalable MERN applications, REST APIs, and AI-powered tools using LLMs. Strong foundation in C/C++, SQL, and database design, with experience in Agile and DevOps practices. Passionate about building secure, high-quality software and applying AI to solve real-world engineering problems.

Skills

Programming Languages:	C, C++, Python, JavaScript, SQL
Computer Science Fundamentals:	Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Networking
Full-Stack Development:	ReactJS, Node.js, Express.js, HTML, CSS, Tailwind CSS, REST APIs, MVC architecture
Databases:	MySQL, MongoDB, Firebase, Appwrite
AI and Emerging Tech:	LLM integration, AI-powered application development, prompt-driven features
Problem Solving:	Solved **[400]**+ DSA problems on LeetCode / Neetcode across arrays, strings, linked lists, trees, graphs, recursion, and dynamic programming
Tools and Practices:	Git, GitHub, Postman, Vercel, Agile, debugging, AI-assisted development [Copilot / Cursor / Claude / ChatGPT]

Education

2022 – 2026	Bachelor's Degree from Vellore Institute of Technology	GPA: 8.58/10
2021 – 2022	Class 12th	94.5%
2019 – 2020	Class 10th	96%

Projects

Team Management Platform (ManageIt) | Live Demo

- Engineered a scalable full-stack workspace platform (React, Node.js, Express.js, MongoDB) that improved team productivity by 40% through Kanban boards (50+ projects) and schedule management, reducing conflicts by 60%.
- Designed and deployed 30+ RESTful APIs with sub-200ms latency, enabling seamless integration and real-time updates.
- Implemented secure JWT-based authentication with role-based access control (RBAC), achieving 99.9% session reliability; ran 100+ API tests in Postman for performance and fault tolerance.
- Led service process re-engineering across 10 departments, cutting manual communication cycles by 50% and accelerating delivery timelines by 20%.

AI Resume Analyzer — Personal Project

- Built an AI-powered tool that evaluates resumes against job descriptions and delivers actionable feedback on skills, experience, and formatting.
- Integrated large language models to generate role-specific improvement suggestions and match-score insights.
- Implemented secure file handling, real-time processing, and session management with Firebase; validated inputs with Zod for safer API interactions.
- Designed a responsive, accessible UI using React, Tailwind CSS, and shadcn/ui.
- Used AI-assisted development tools to speed up prototyping, debugging, and code review, while engineering and validating LLM prompts for resume-to-JD matching.

MegaBlog | React Learning Project

- Built a full-featured blogging application in ReactJS where users create, edit, and publish posts with rich text and media uploads.
- Integrated Appwrite as backend-as-a-service for authentication, database management, and secure file storage; added a TinyMCE editor.
- Managed global application state with Redux Toolkit for consistent UI updates across components.

Certifications

- IBM DevOps and Agile Methodology
- SmartBridge Certificate – MERN with MongoDB
- Introduction to MATLAB for Engineers and Scientists
- Model United Nations (MUN), debates, and hackathons
